CUSTOMER SATISFACTION FEEDBACK

As a consumer you can rate any company with account status on the website. The easiest way to find the company is to place the last 4 digits of their phone number into the search for business area.

The company will receive notification of the rating and the review. Please note that the company has an opportunity to respond to the review if the company has an account on Safe and Trusted Canada. They can also reject the review if they wish to handle issues in private and resolve problems rather than post issues in public. The business must post the review to verify that you are a customer. This ensures that businesses are not rating themselves, and if this is the case, there will be a permanent alert placed on the business profile. Please note that the business will have several different review sites listed on their profile and you can leave reviews on any review site. This makes it easy for you to leave a review on any business that does not have an account.

The company listed below has an account on the above website. If the company has done well, please leave a review. If the company has issues please phone the company owner to ensure that they know you are unhappy. Please note that the link below takes you directly to the company profile Leisure Travel 2000 Inc.
